What's New in the?

“Hotel Billing Software” is a simple yet powerful booking and invoicing software

solution for hotels, restaurants and leisure industry. Hotel Billing Software is designed for guests, hotel managers, restaurant managers, and many other business people. Its powerful features, and self-explanatory user interface make it easy to use, flexible and easy to learn. Simple and professional operation of the hotel bill It is intended to be the ideal solution for booking and invoicing guests and customers. Even for business people it is the best solution for checking the records of all expenses. Manage bills in the Web The hotel bill generator is very easy to use: in only a few steps you can generate bills for guests, tables, employees, service, taxes and new items. The hotel bill also allows to print the database and export all records as a text file or in an Excel spreadsheet. Hotel Billing Software for Windows 8, 8.1 and Windows 10! Hotel Billing Software - hotel bill is an application designed to offer you a more efficient way of keeping track of bills that are made out in a hotel or restaurant. It displays a user-friendly interface which makes it accessible to people of all experience levels when it comes to computers. You get quick access to all its main functions from the main window, in a straightforward manner. A bill is easily created and customized with details about the customer's name, address, table, waiter and details with the items in the order. If during the service of a customer an event is worth mentioning, the application offers you a text field for remarks. Items are added to the list by simply clicking an empty information field and selecting the desired content. In case a product isn't in the database, you can add it in a few steps by entering information about its number, name, category, rate and remark. The item is then available in the application until you delete it. In the same simple manner, you are able to add and manage new categories, pricing units, employees and taxes. This makes it possible for you to adapt the application to any kind of service that requires billing. With Hotel Billing Software you are able to manage multiple records at the same time and create daily, weekly, monthly and yearly reports. All of them can be saved in RTF and PDF formats and printed later if needed. The application is also capable of saving all the bills created across a long period of time and adds them to a database. This way, if you lose a printed record, you can always recover the information. In conclusion, if you're looking for a comprehensive and efficient way of keeping detailed records of bills, you should definitely try Hotel Billing Software. Hotel Billing Software Customer reviews: "Most of the information about your hotel is stored in an online database that you can access 24 hours a day
